

Greetings member of UNENE,

[Click here for conference website](#)

The CNS Nuclear Operations and Maintenance Division is excited to offer its first in-person edition of the Candu Maintenance & Nuclear Component Conference since the start of the pandemic. To offer you the best experience possible, the conference was deferred from November 2022 to April 2023, allowing more time for the organizing committee to plan the event. However, the themes, program and venue have remained unchanged.

The focus of the conference is 'Fostering Innovative Industry Advancements' across our nuclear fleets to ensure nuclear power generation remains a leading sustainable supplier of electricity. Strategic Operations & Maintenance, and life extension techniques, allow our plants to operate continuously in a more efficient and safe manner to deliver low-cost clean electricity, and combat global warming.

The 'Utility Engagement' theme remains an integral part of this conference, with the Utilities present and engaged in all parts of its program (presentations, discussions, visits with the exhibitors, networking with young professionals and students, etc).

Whether you are involved in operating, outage or waste management and decommissioning maintenance, or with major component replacements, this conference is for you! And to contribute to its success, here are some of the ways you can get engaged:

1. [Sponsor](#) the conference in general, or a specific part of its program.
2. Secure an [exhibit booth](#) to showcase your products and services.
3. Encourage your staff to [present](#) at our technical sessions.
4. Encourage your staff to simply [register](#) as participants.
5. Encourage University students in your network to [present a poster](#) paper.

We are grateful for the financial and resource (volunteers, speakers, registrants) support by the nuclear industry for this and many other CNS-organized event. We thank you if you have already signed up for this conference. If you haven't yet done so, we urge you to consider joining us for this event, not just as a participant, but as a sponsor and/or exhibitor. Without your support, quality events like this would not be possible. In return, we perceive many benefits for your organization from being involved (eg, corporate visibility, personal development in particular for young professionals) and our goal is to deliver on those benefits.

Should you have any questions, or we are reaching out to the wrong contact, or you wish to make a sponsorship or exhibit commitment, please do not hesitate to get in touch with me.

As a member of the CMNCC-2023 organizing committee, I would like to thank you for considering this opportunity to engage with the nuclear industry.

A handwritten signature in black ink, appearing to read 'J. Plourde', is positioned above the printed name.

Jacques Plourde
